Noise, Vibration and Dust Nuisance!

What FRAG are Doing.

- Obtained expert advice from a former HSE Principle Inspector of Building Sites who has advised us that Sefton Council are not doing enough to reduce building site nuisance.
- Formally raised the issue with Sefton Environmental Health Officers who are the regulatory Authority for Noise Vibration and Dust Nuisances.
- We have secured a budget from the Parish Council to get professional help to challenge the Developer and pressure them to comply with best practice (which forces developers to employ noise attenuation techniques).
- FRAG Parish Councillors went down to the site to make developers turn off the water pumps still running at 10pm!
- FRAG have lent equipment to residents so they can measure the noise levels they are experiencing.
- We can only do this thanks to your support for our Borough and Parish Councillors THANK YOU!

How YOU can help.

- Report any incidence of nuisance caused by noise vibration or dust to the Environmental Health Dept at Sefton Council via 03451400845 Monday to Friday 8-6pm.
- Make sure to say this is for the attention of Environmental Health and give details such as time, date and duration of the nuisance.
- Or Contact them through the Sefton Council Website contact form. <https://forms.sefton.gov.uk/contactform/>
- Or link to this through the FRAG website www.frag.org.uk .
- Please let FRAG know that you have lodged a complaint email Bob McCann Bob@frag.org.uk or phone 07476069487. **This will help us challenge Sefton Council's responses and provide additional information for the experts the Parish Council will be employing.**
- **This Leaflet is going out to the closest 200 homes to the building site, but the more people who object the stronger the case, so spread the word.**
